Please continue checking out to discover more about the relationship in between dancing and IBS.

## Irregularity

Constipation is among the most typical reasons for abdominal discomfort and cramps. It can take place due to a variety of factors, like not drinking adequate amounts of water, following a diet lacking in fiber, as a side effect of particular medication, incorrect lifestyle, etc. Irregularity can impact individuals of any age groups.

Although for the most parts, stomach gurgling is not a cause for worry, it certainly puts an individual in an awkward situation, especially when your colleagues next to you, hear it clearly. Likewise, referred to as borborygmus, stomach rumbling is an audible sound that can even awaken an individual. No surprise, it is also called stomach noise.

## Diverticulitis

The wall of colon includes little, out pouches. Obstruction or inflammation of these out pouches results in the condition called diverticulitis. Primarily, older people are likely to experience this condition.

Senior citizens experiencing constipation ought to think about the following questions:

### Do You Often Have Less Than 3 Bms a Week?

Do you discover it hard to pass stool?

### Are Your Stools Lumpy and Tough?

Do you have the sensation of being blocked or that you have not emptied your bowels?

*Responding to yes to one or more of these concerns could show a concern with irregularity.*

## Causes

Elderly people and their caretakers ought to consider what might be contributing to their signs so that they can take the suitable procedures to attend to the issue. People normally experience irregularity for the following reasons:
